Akinbo Olamilekan D.

FRONT-END DEVELOPER

SUMMARY

As a Front-End Develop, I have insight in planning and coding websites. My abilities in HTML, CSS and JavaScript allow me to make websites are outwardly engaging and appealing, without sacrificing the functionality. I can work well as part of a team, and when and if required, I can carry out tasks independently.

WORK EXPERIENCE

FUNDZ
https://fundz-by-shile.netlify.app/
Front-End Developer

Fundz is a team project that involved I and the User Interface designer who built the interface. The project took us about 3 weeks to build up tot his stage and I had closely worked with the UI designer to ensure the elements on the page are easy to replicate in code to near perfection.
Fundz is a financial management app that helps users automate their savings and investments while also allowing them take charge of and track their expenses through out the month.
My duty as the Front-End web developer on this preject was to bring this UI design to life, ensure responsiveness, without sacrificing any of the functionality. The project was entirely built with HTML, CSS, and JavaScript.

FYLO
https://capstonegroup14.netlify.app/
Lead Front-End Developer

This project was done as part of an internship training I had recently participated in. I worked with a team of Front-End developers amongst which I split the task amongst the team members with some first working on the actual page, after which a others worked on the desktop and mobile responsiveness. I and another team member then worked on the cleaning out the code, removing repetitive codes and ensuring the readability of the code.

EDUCATION

(HND) Mass Communication
Yaba College of Technology   2016-2019
